PROFESSIONAL SUMMARY

Results-driven **Software Developer** with **3.8 years of experience** in designing and developing scalable web applications using **Java, Spring Boot, Angular, Vue.js, and PostgreSQL**. Strong experience in delivering **government and enterprise-level applications**, implementing **Keycloak-based Identity and Access Management (IAM)**, secure authentication and authorization, dashboards, MIS reports, GIS-based systems, and AI chatbot integrations. Adept at full-stack development, REST API integration, and Agile methodologies.

TECHNICAL SKILLS

Frontend: Angular, Vue.js, TypeScript, HTML5, CSS3

Backend: Java, Spring Boot, Microservices, RESTful APIs

GenAI & AI Integration: Generative AI, Retrieval-Augmented Generation (RAG), LangChain, Large Language Models (LLMs), Prompt Engineering, Semantic Search, Document Processing (PDF, Excel, Images), Embeddings, Vector Databases

Security: Keycloak, OAuth2, OpenID Connect (OIDC), JWT, RBAC

Database: PostgreSQL, MongoDB

DevOps & Monitoring: Docker, Jenkins (CI/CD), Grafana

Workflow Automation: Apache Airflow (Job Scheduling & Batch Processing)

Tools: Git, Postman, Android Studio, Node-RED

Testing: JUnit, API Testing

EXPERIENCE

Software Developer

Eagle Software India Pvt Ltd

Nov 2022 – Present
Chennai, India

- Delivered multiple large-scale **e-Governance and enterprise applications** using **Java, Spring Boot, Angular and PostgreSQL**, ensuring scalability, security, and high performance.
- Designed and implemented secure **authentication and authorization frameworks** using Keycloak, OAuth2, OIDC, and JWT with centralized user management, Single Sign-On (SSO), and Role-Based Access Control (RBAC).
- Developed interactive **administrative dashboards**, analytical views, and comprehensive MIS reports in PDF and Excel formats to support executive decision-making.
- Built configurable **dynamic approval workflows** with multi-level role-based routing, audit tracking, and automated Email/SMS notification systems.
- Integrated multiple third-party and internal RESTful services with secure token-based communication and implemented robust exception handling and logging mechanisms.
- Contributed actively in **Agile/Scrum ceremonies**, requirement analysis, sprint planning, code reviews, and client demonstrations to ensure iterative and timely delivery.

Roles and Responsibilities

- Enterprise Governance & Workflow Management System:** Designed and developed modular systems supporting user onboarding, dynamic form configuration, approval workflows, document uploads, audit logs, and real-time status tracking. Implemented secure REST APIs and optimized database queries for performance and reliability.
- Geo-Location & Public Service Portal:** Developed map-based public interfaces enabling geo-tagging, location registration, proximity search, and role-based approval flows. Integrated GIS functionalities with backend services for accurate spatial data processing.
- Identity & Access Management Integration:** Implemented enterprise-grade IAM solutions using Keycloak integrated with Spring Boot microservices. Enforced fine-grained authorization, token validation, and centralized authentication across multiple modules.
- AI-Enabled Communication Platform:** Integrated chatbot capabilities supporting text and voice interaction. Developed real-time chat modules using modern frontend frameworks and packaged applications for cross-platform deployment including Android builds.

EDUCATION

Bachelor of Computer Science and Engineering

Anna University

2017 – 2021
Tamil Nadu, India
